Collo, torace, addome

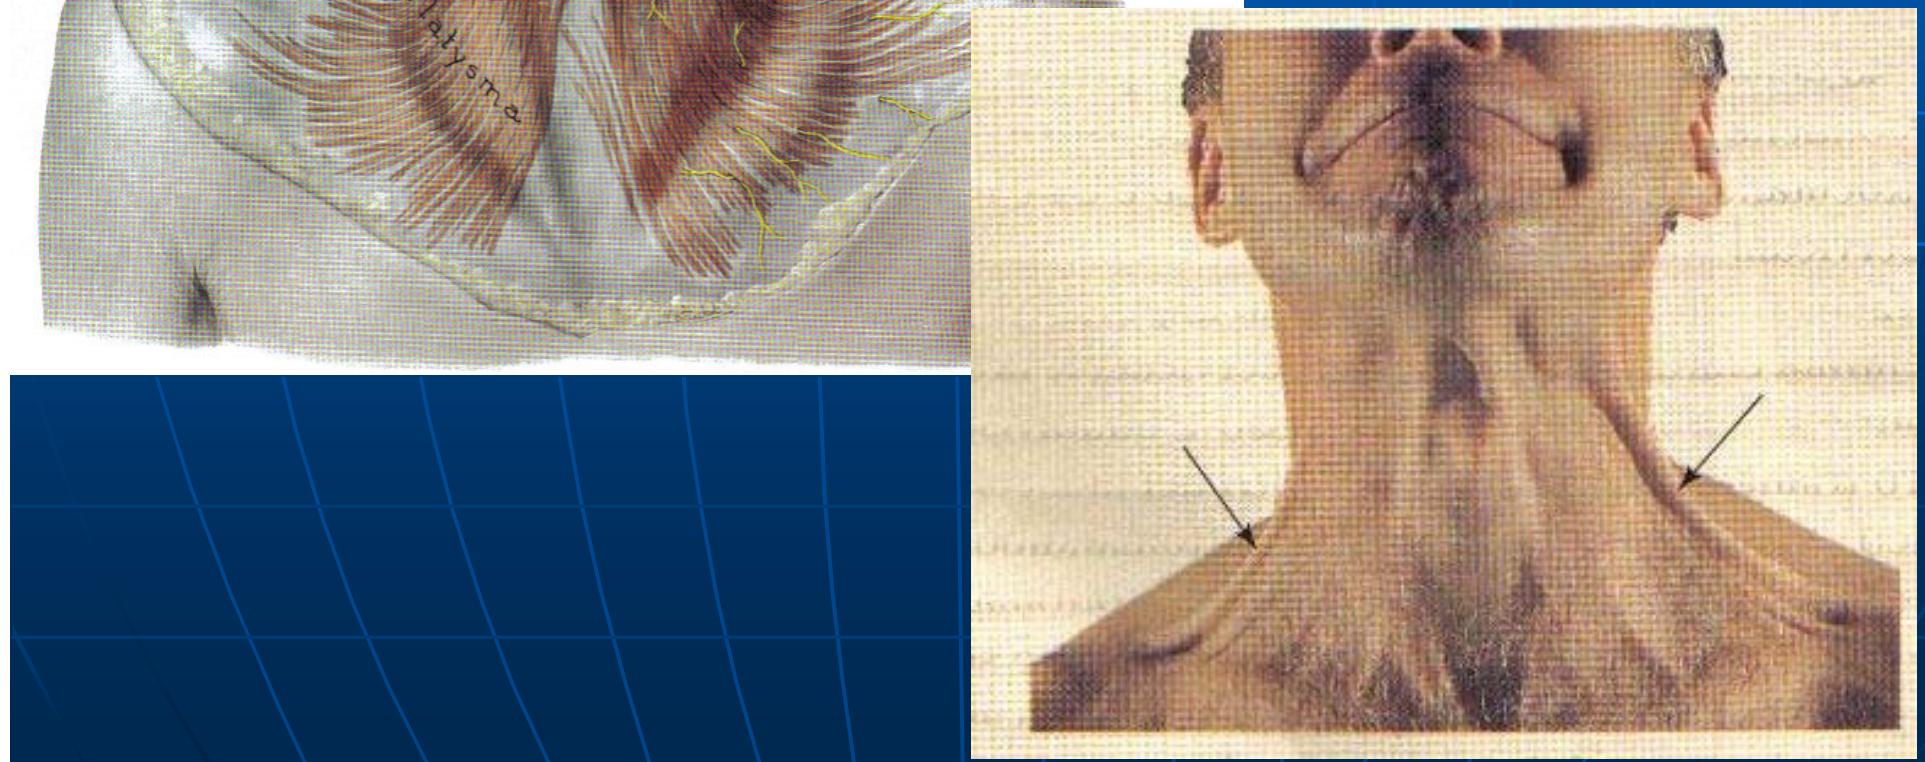

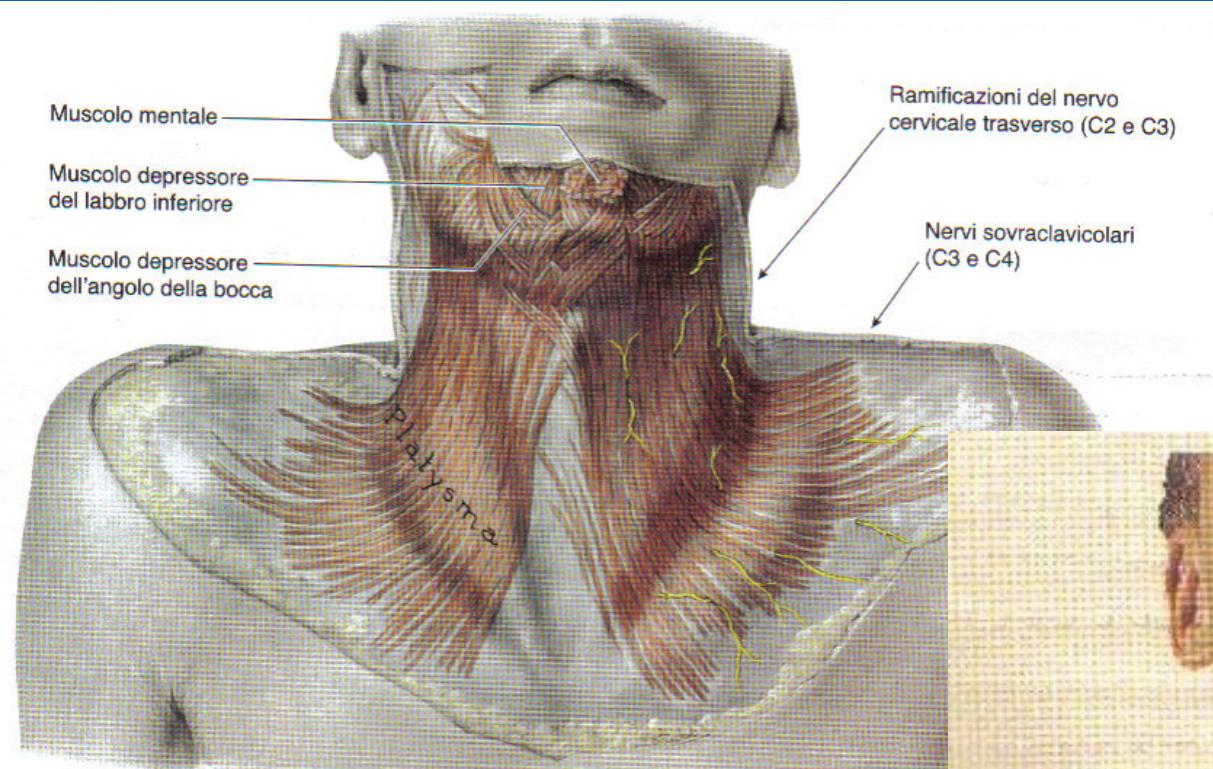

Muscoli del collo

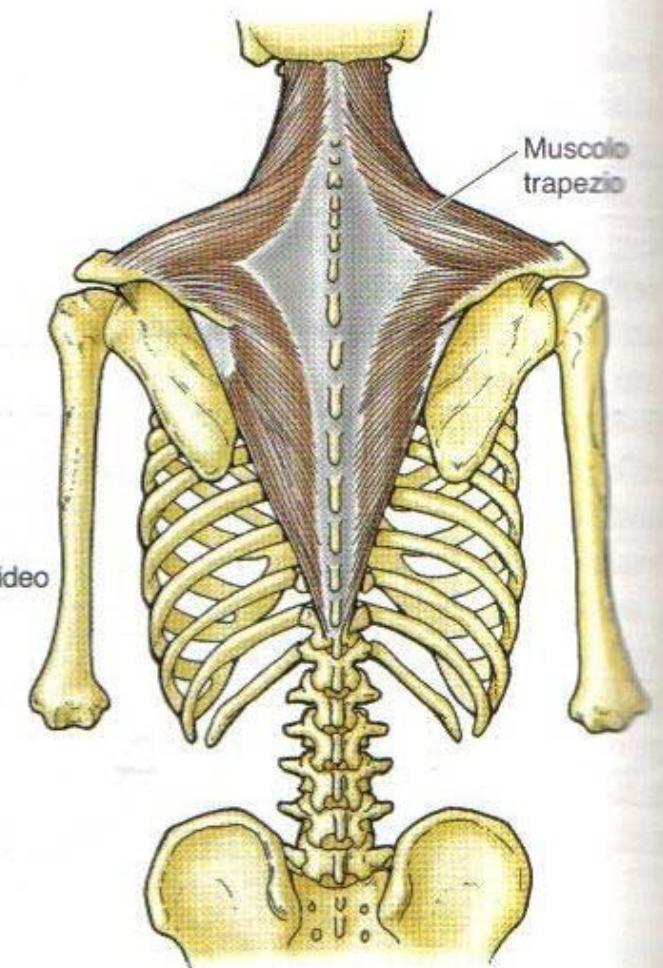

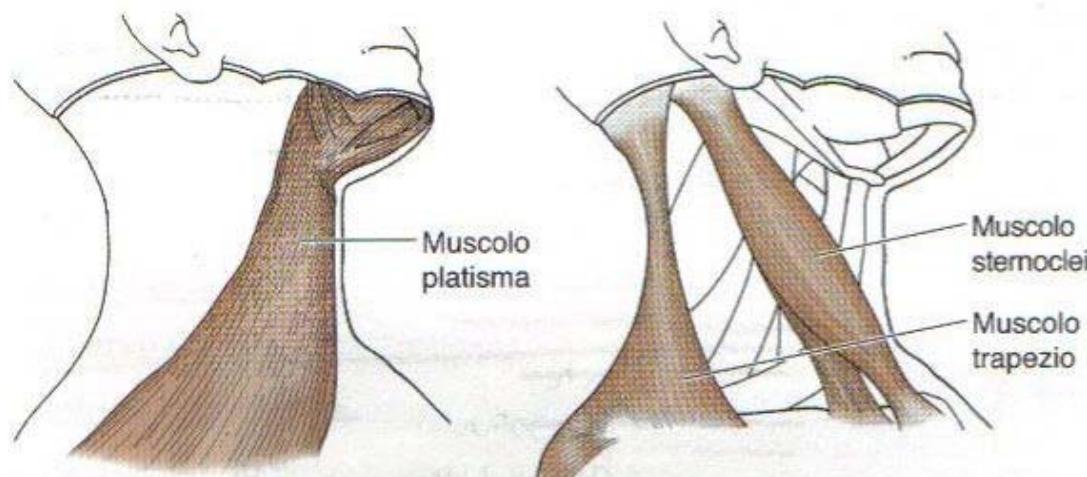

- Posteriori: intrinseci del rachide
- Anteriori: sopra e sottoioideoi
- Laterali: platisma,
sternocleidomastoideo, trapezio,
scaleni

Platisma

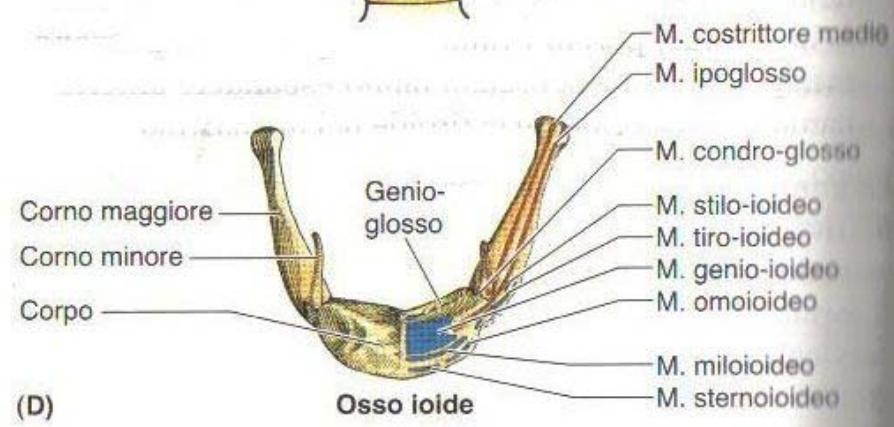

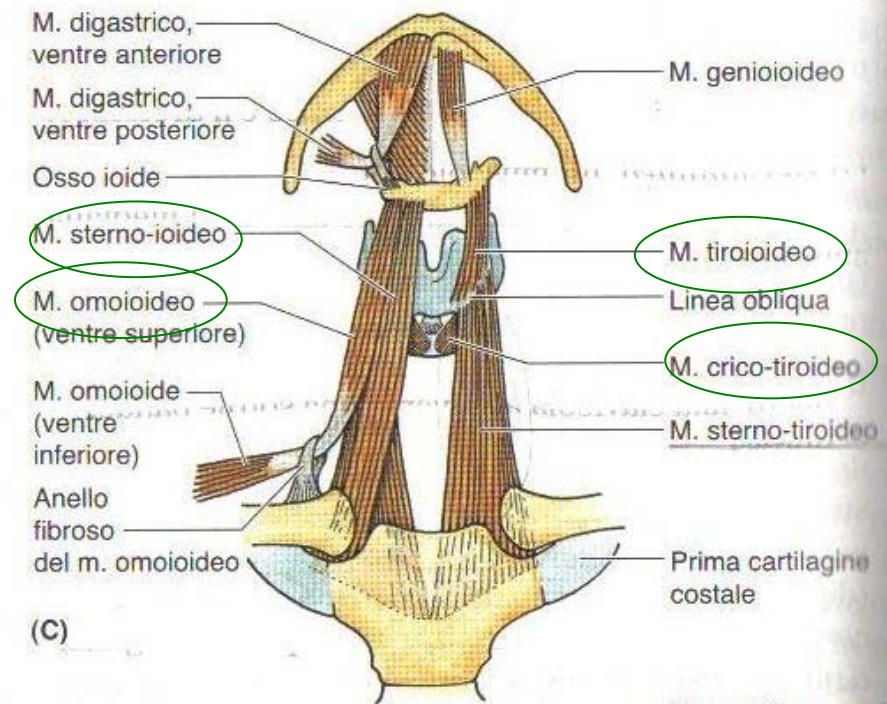

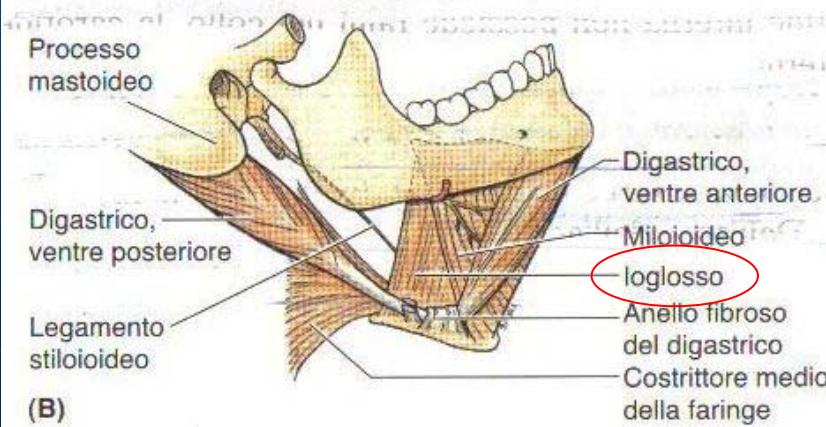

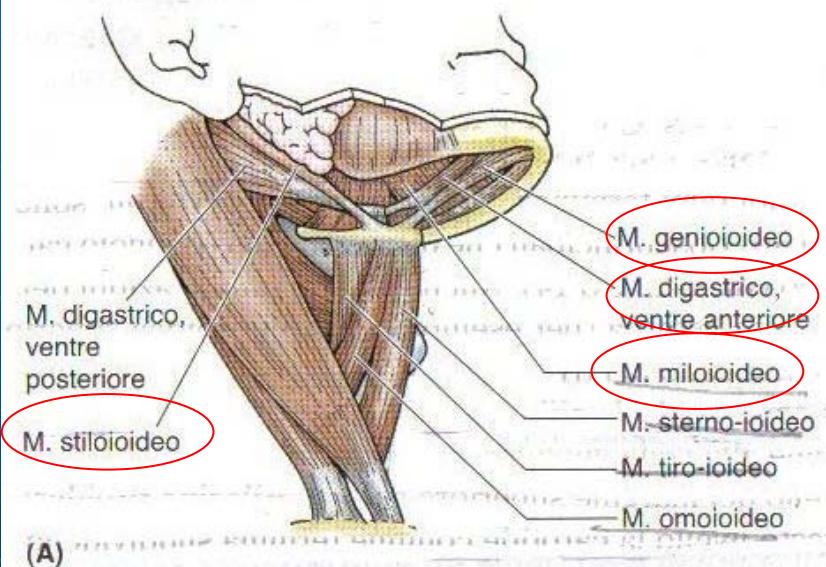

MM laterali

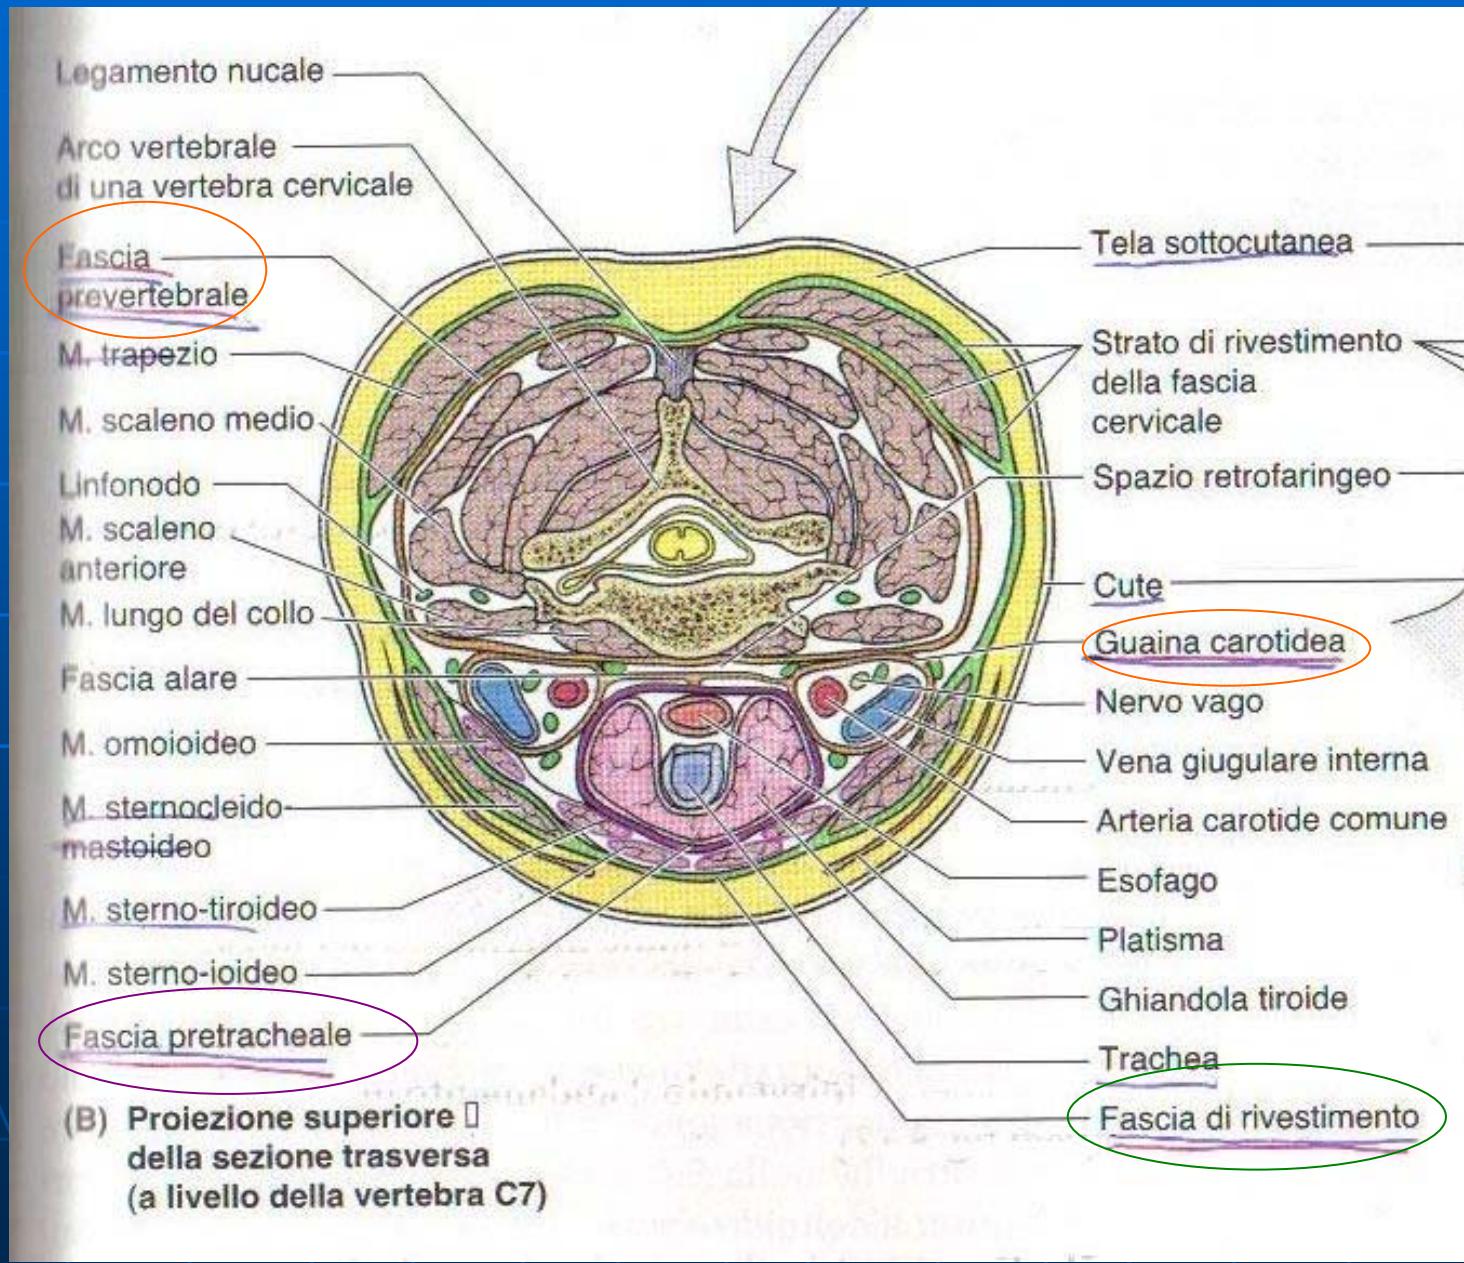

MM ioidei

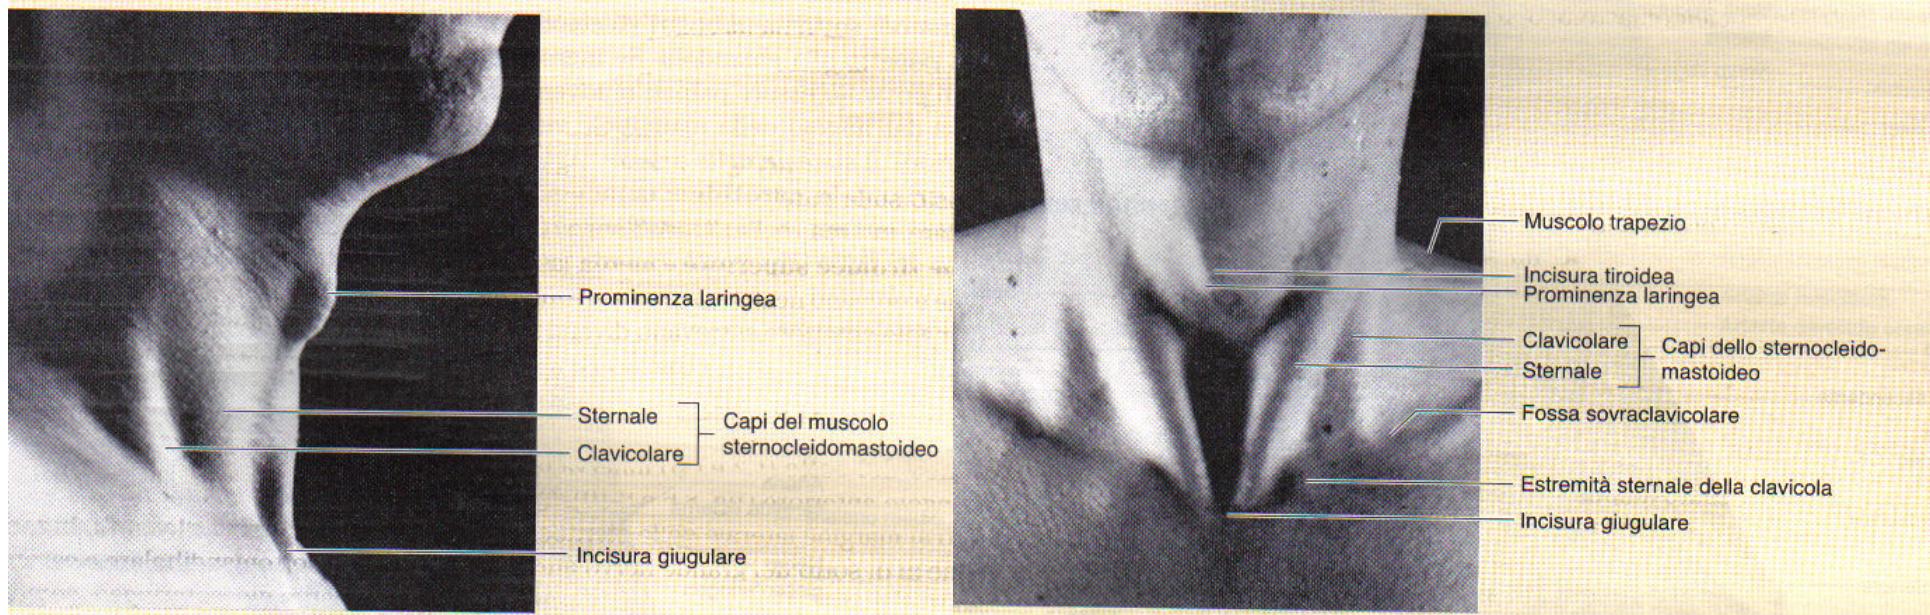

TABELLA 0-3 MUSCOLI SOPRAIOIDEI E SOTTOIOIDEI.

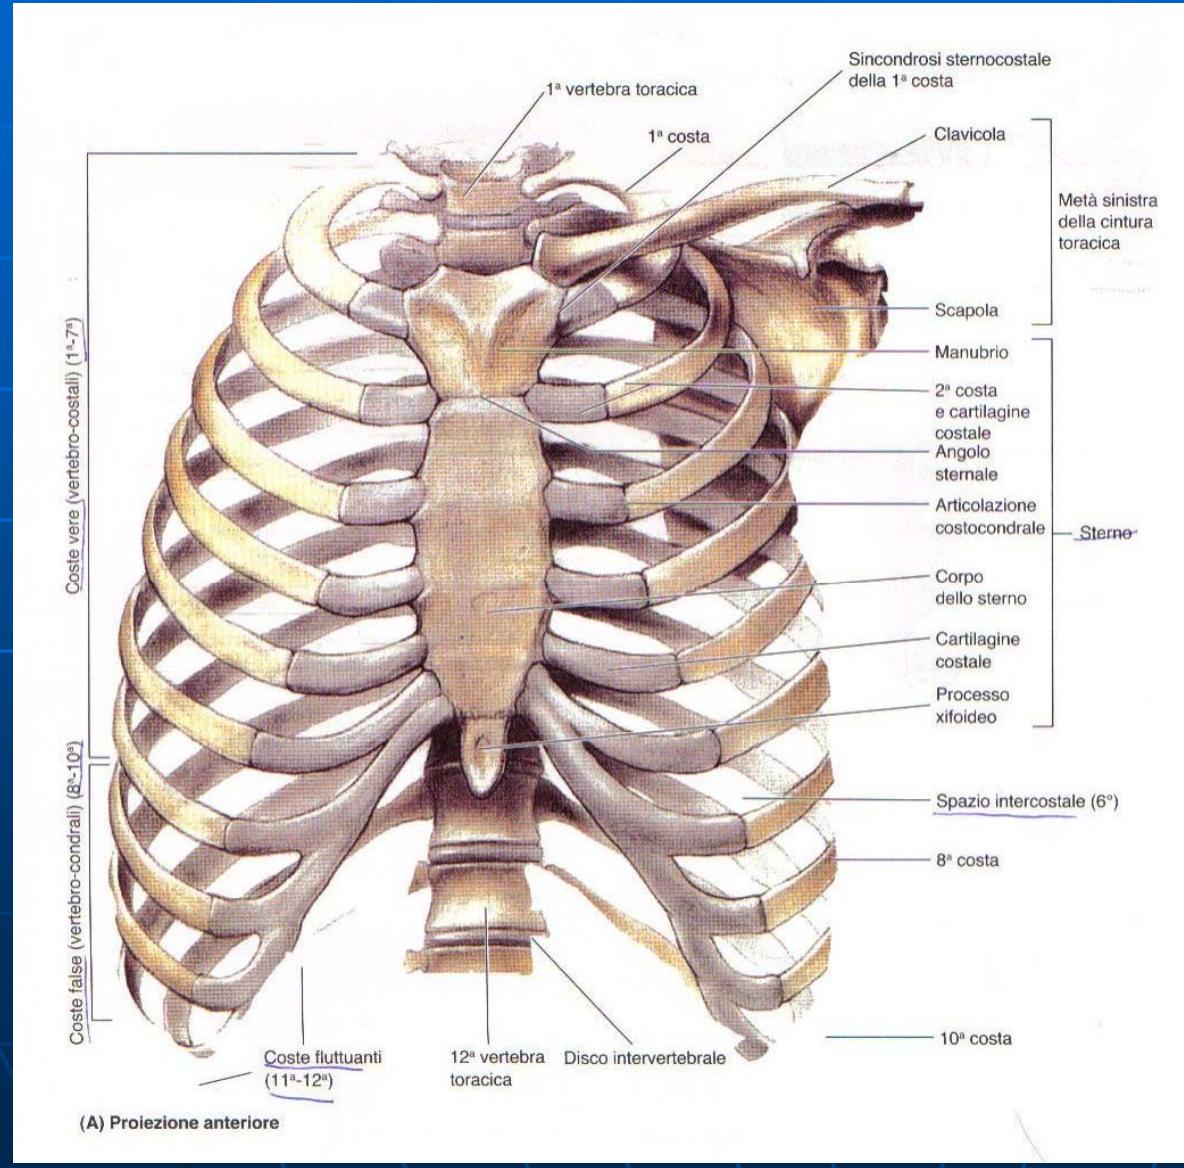

Fasce del collo

Anatomia superficiale del collo

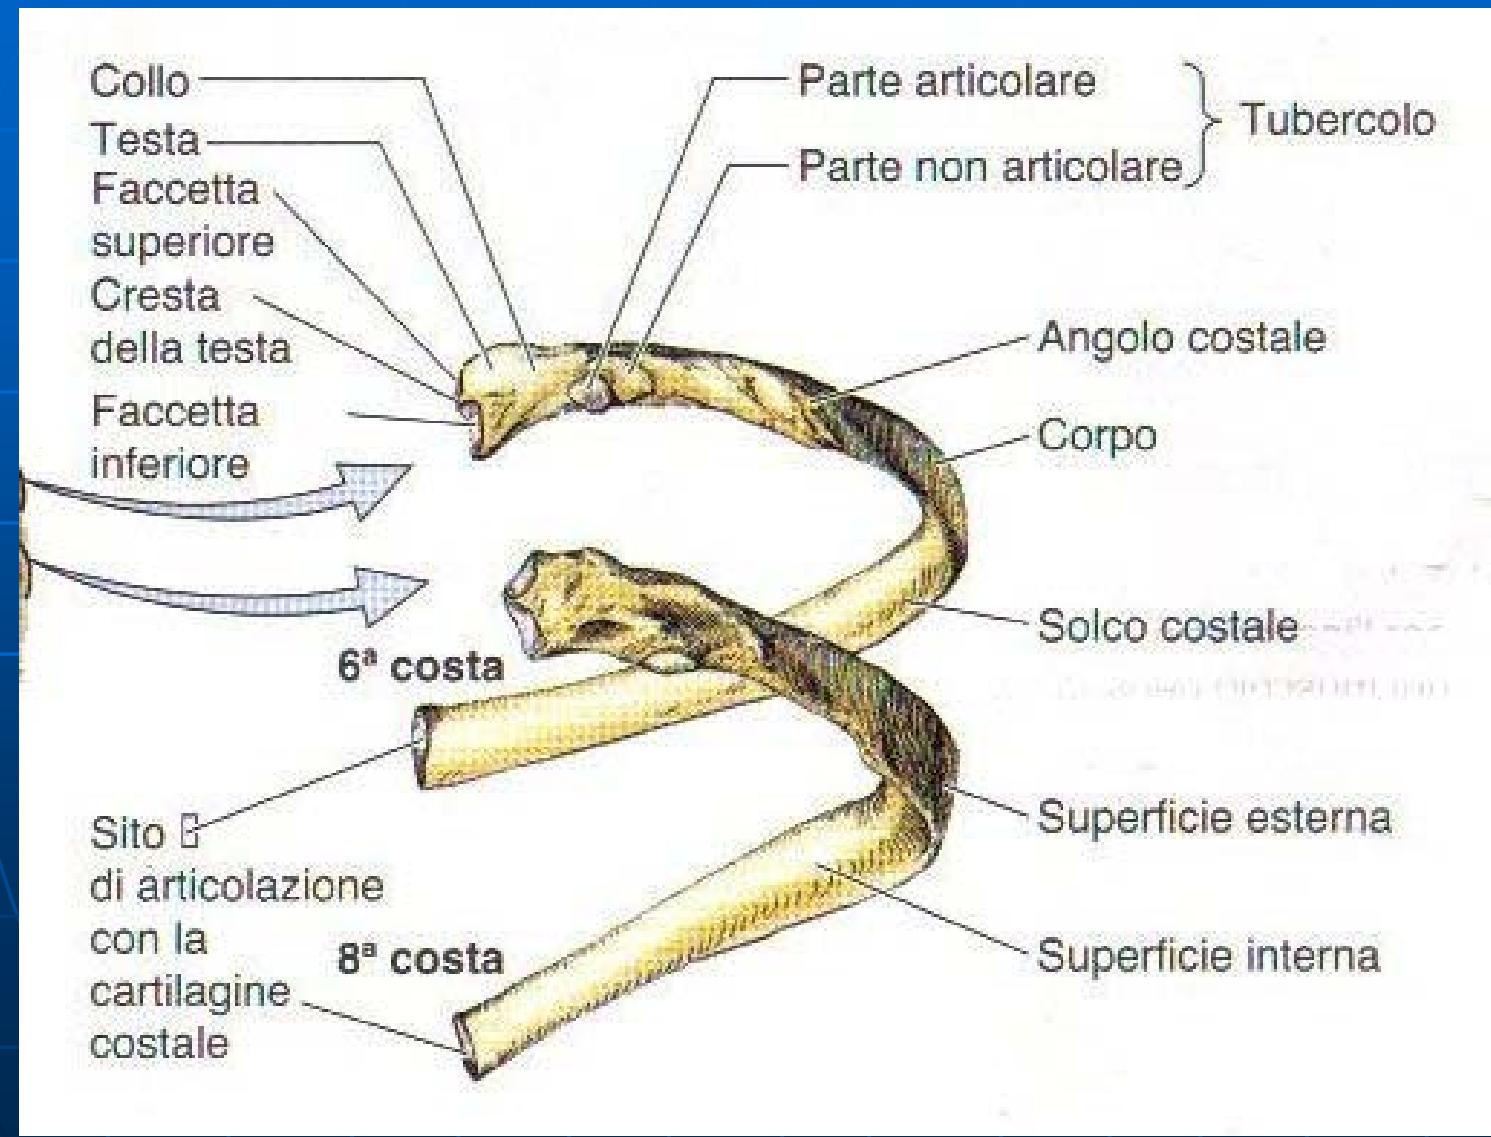

Gabbia toracica

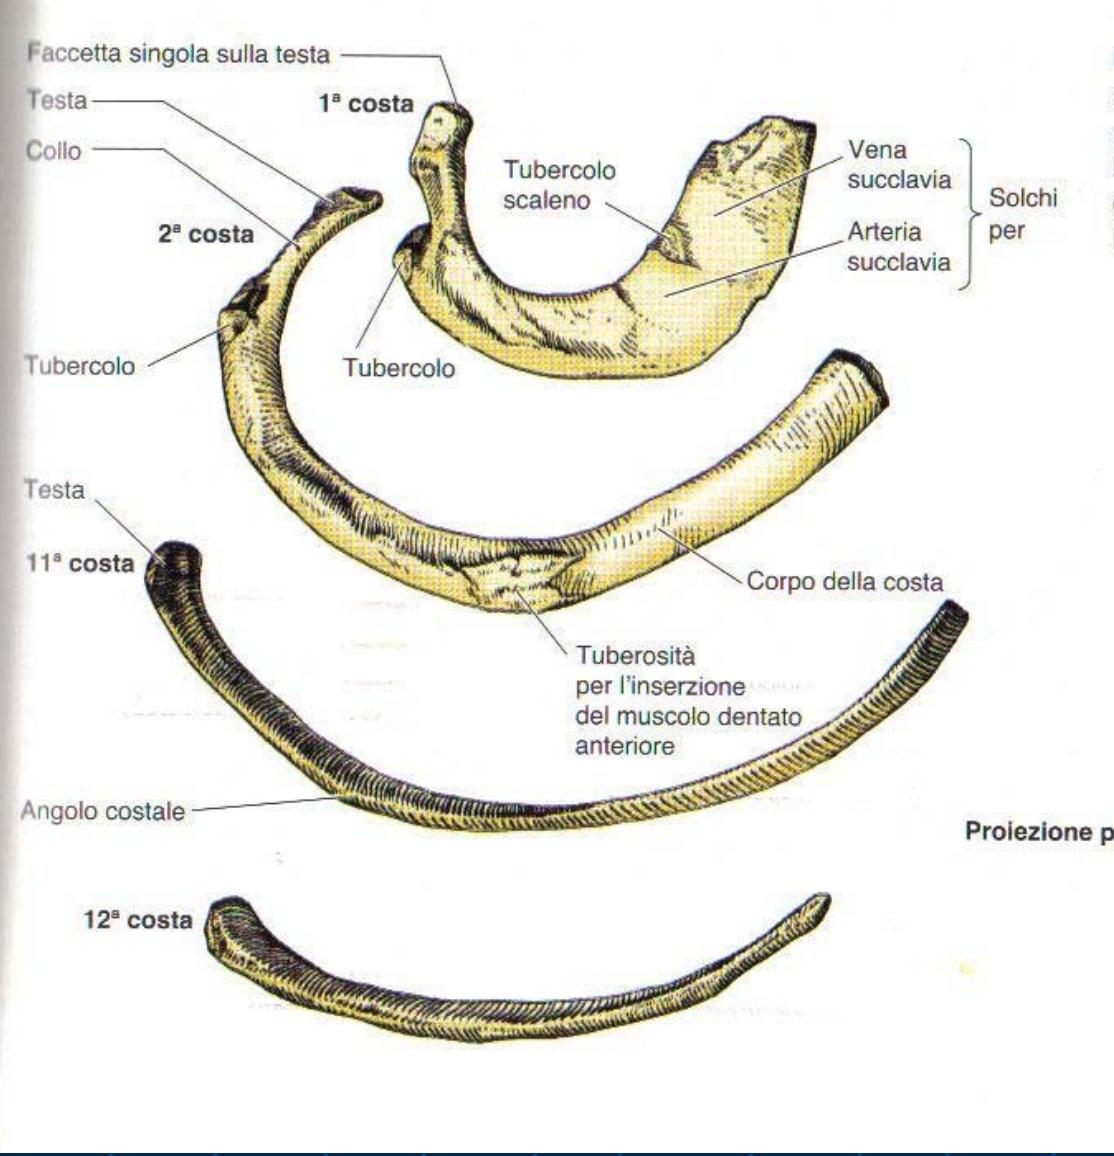

- Sterno
- Vertebre dorsali
- Coste:
 - vere (1-7)
 - false (8-10)
 - fluttuanti (11-12)

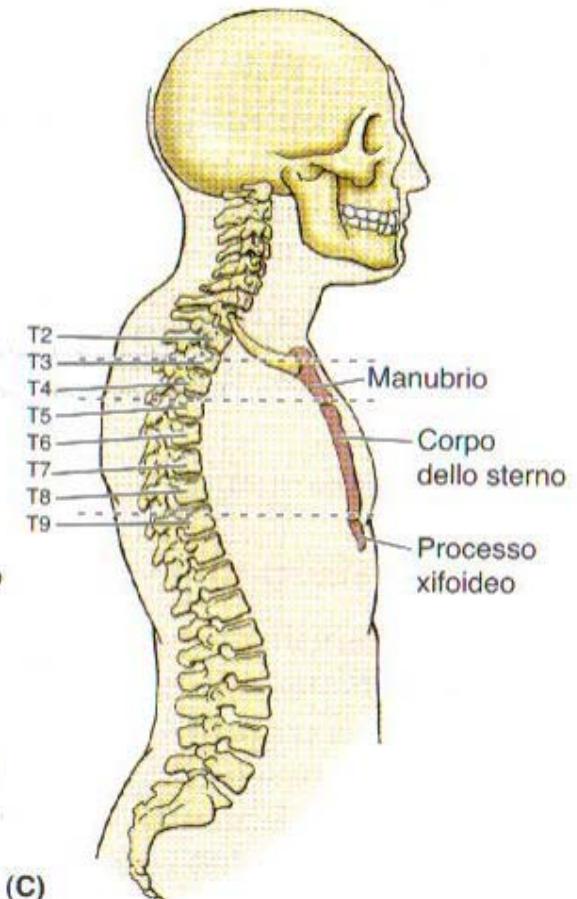

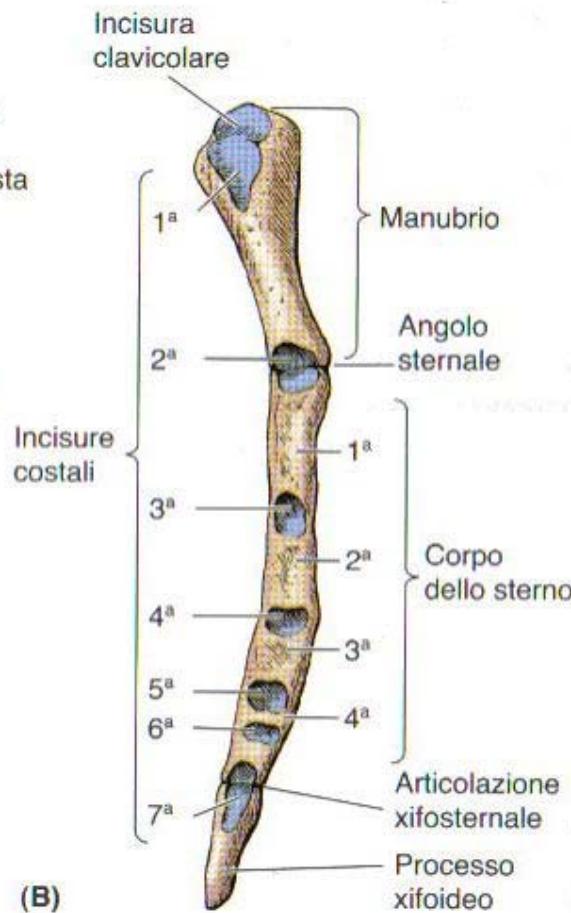

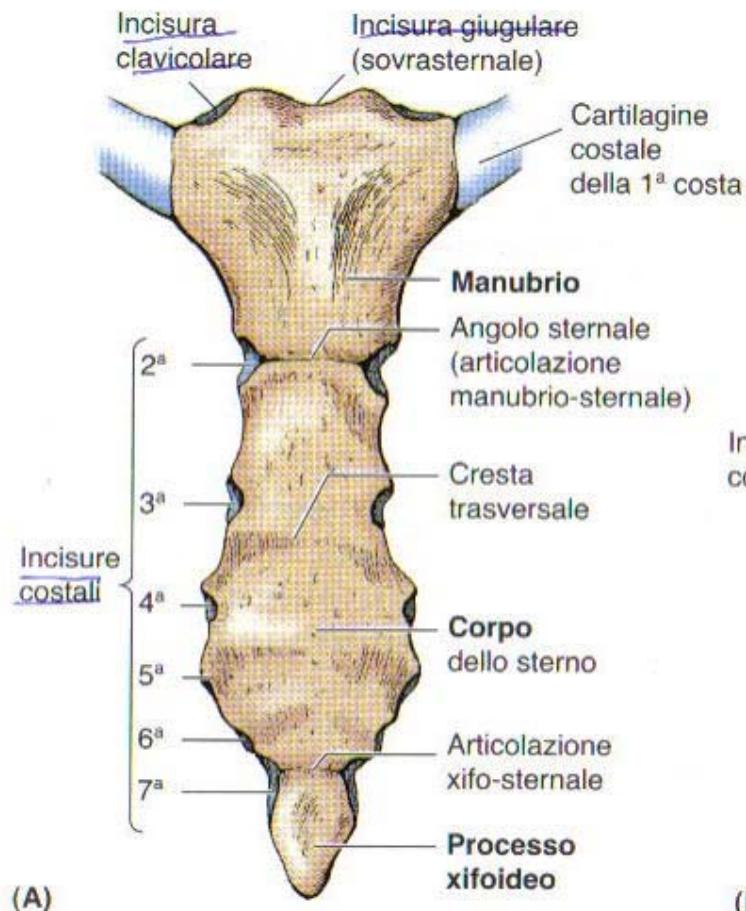

Coste tipiche (3-9)

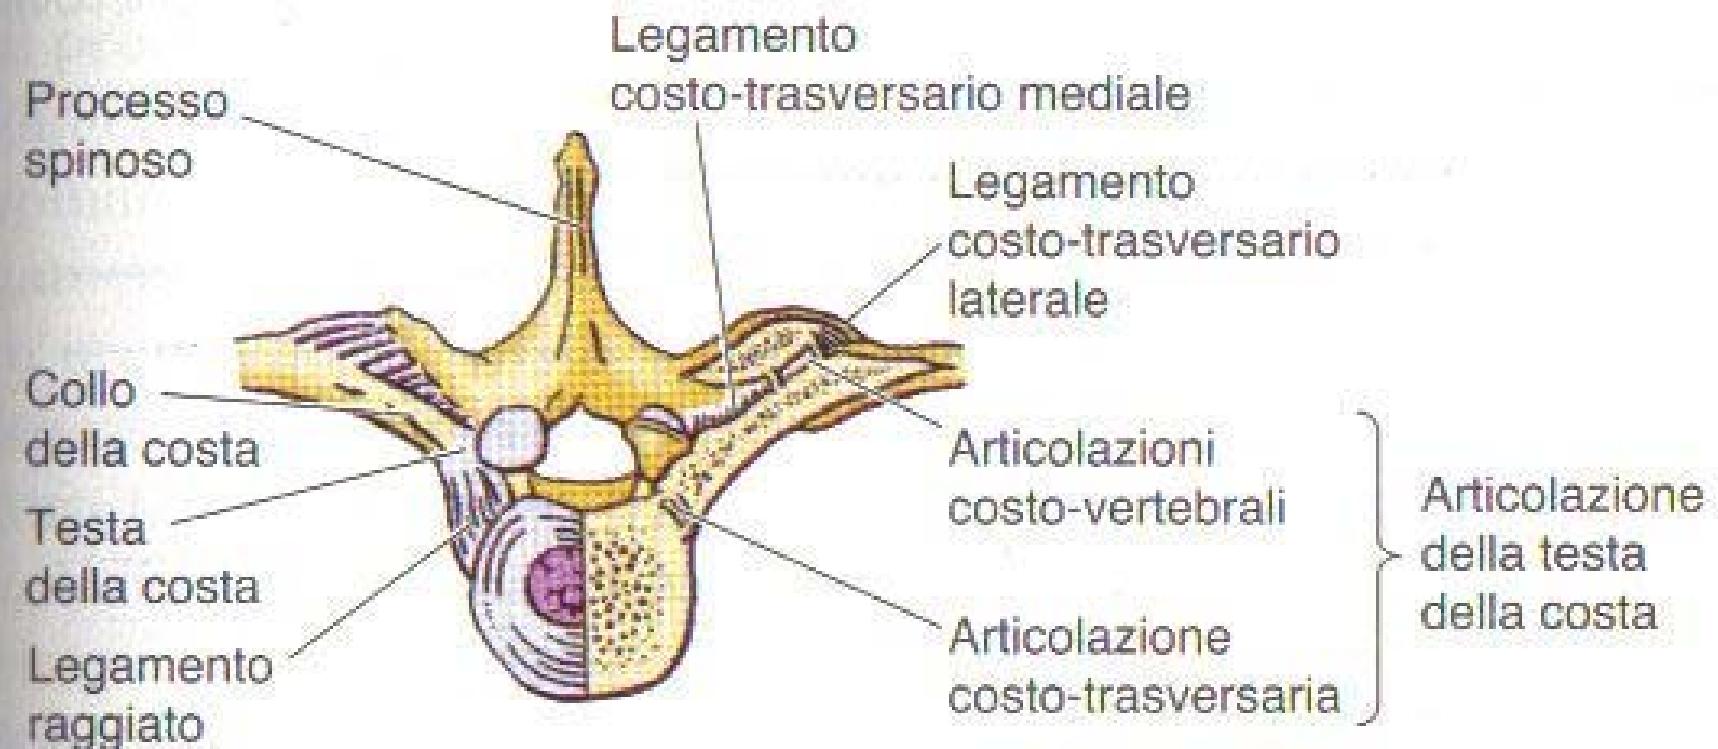

Coste atipiche

Sterno

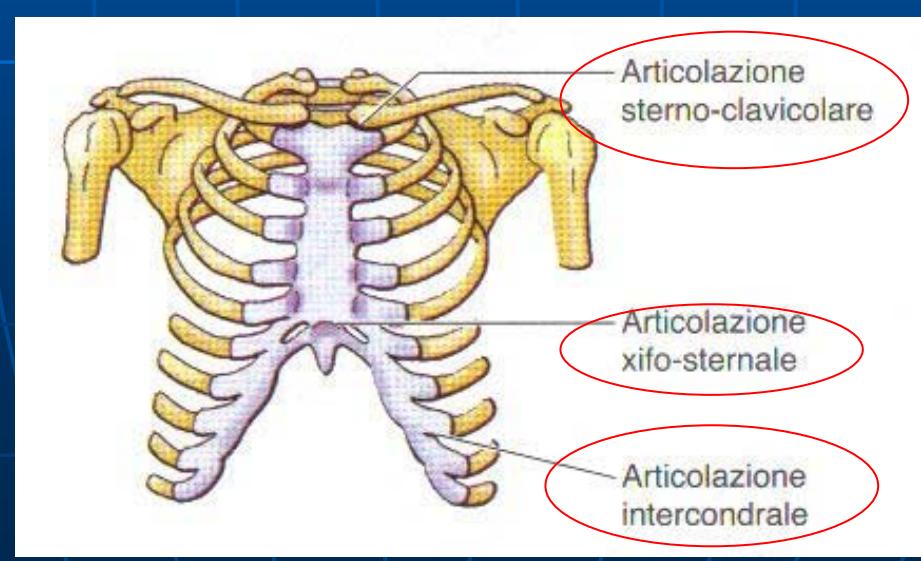

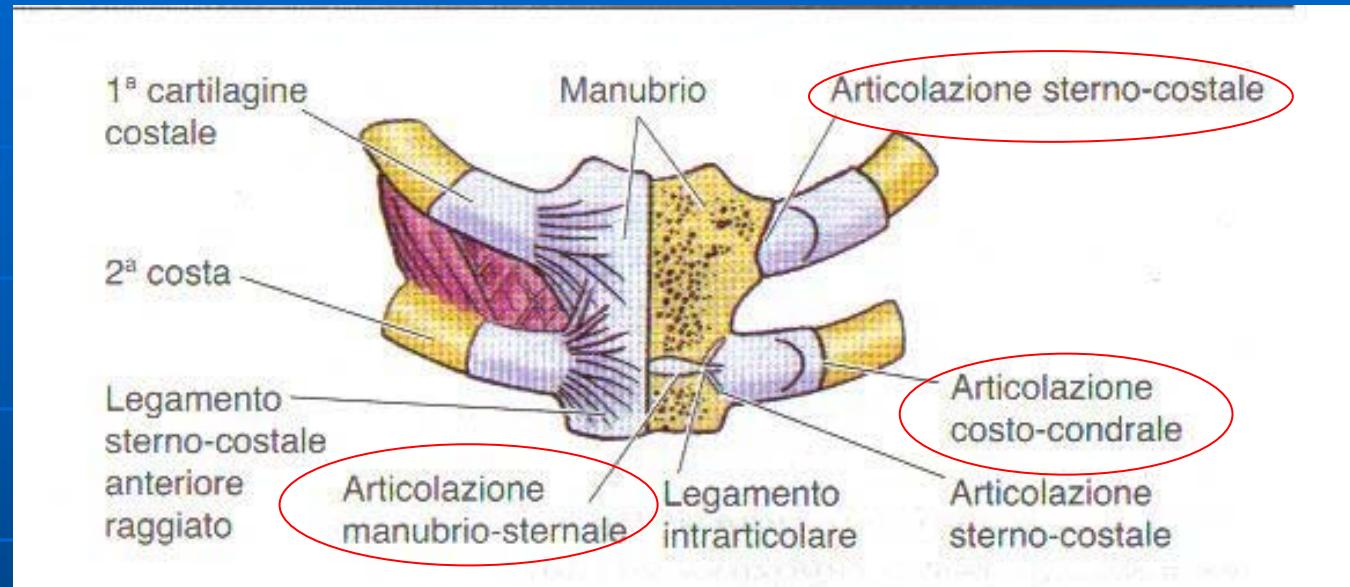

Art. costovertebrali

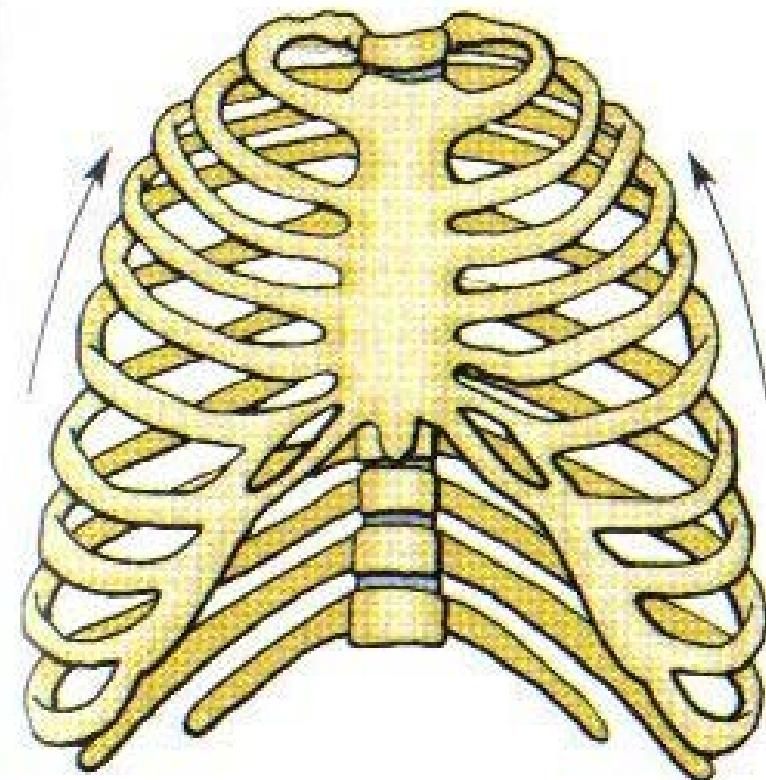

Artrodie (piane)

Articolazioni

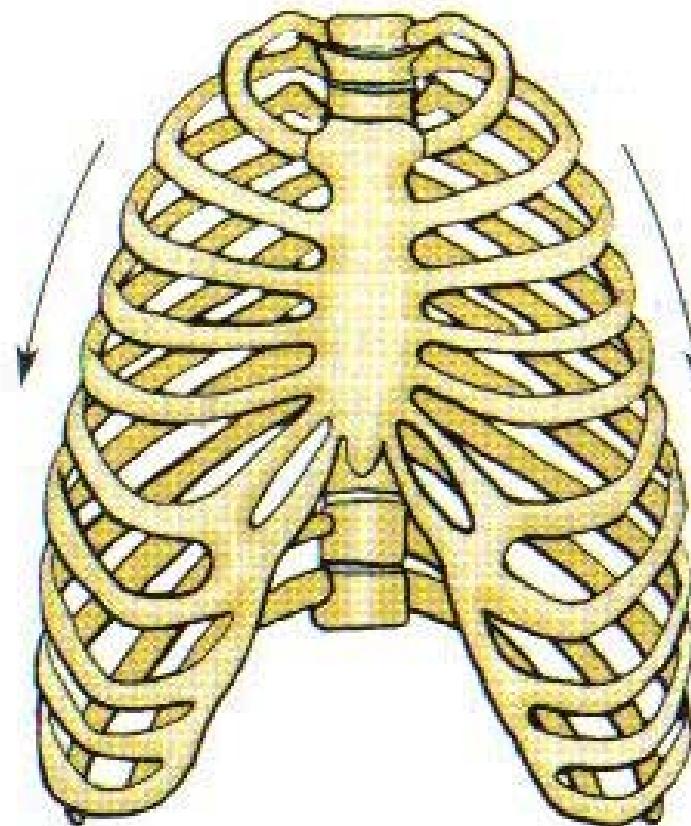

Respirazione

(A)

Inspirazione

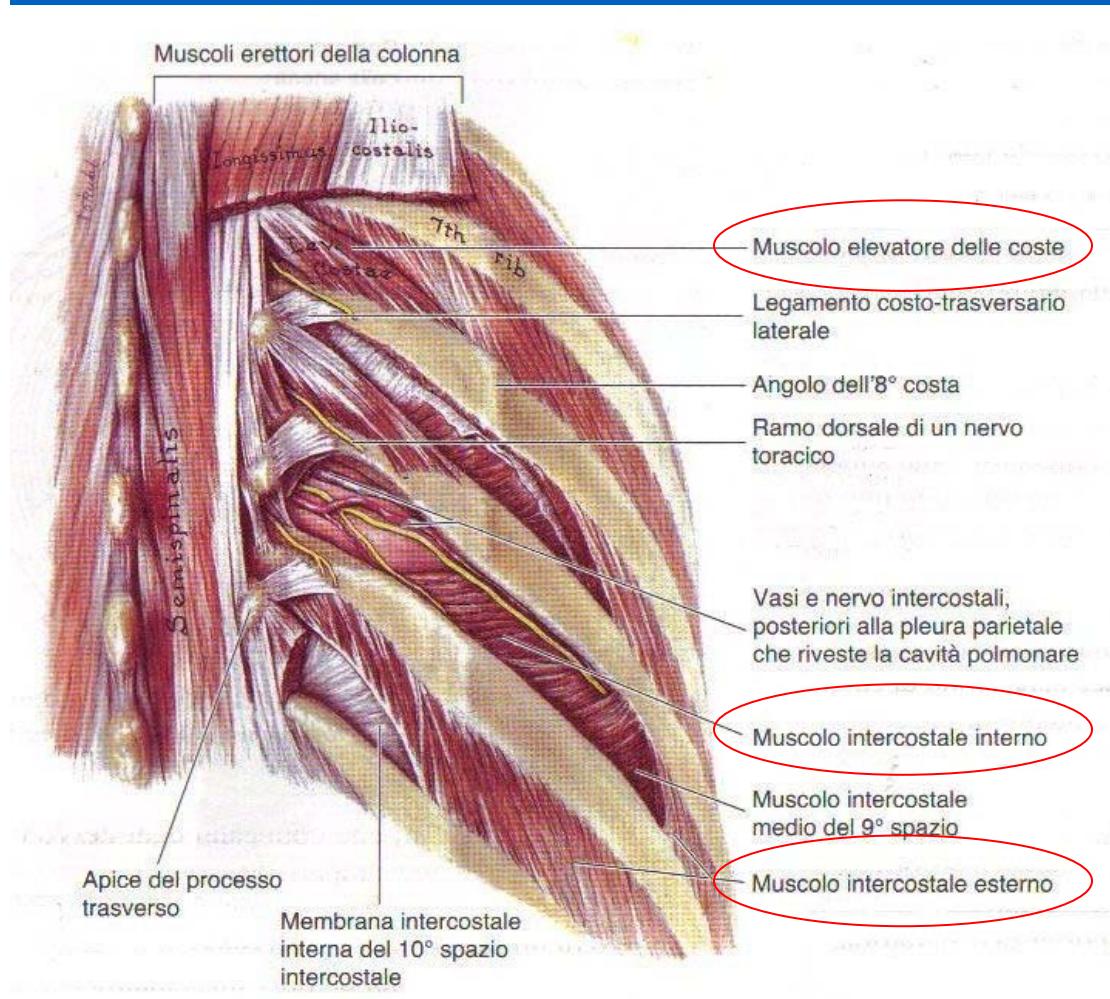

Espirazione

MM del torace

- Intrinsici: elevatori delle coste, intercostali, sottocostali, trasverso spinale
- Extrinsici: toracoappendicolari, spinoappendicolari, spinocostali, diaframma

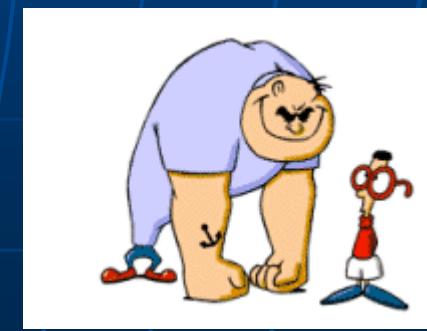

MM intrinseci

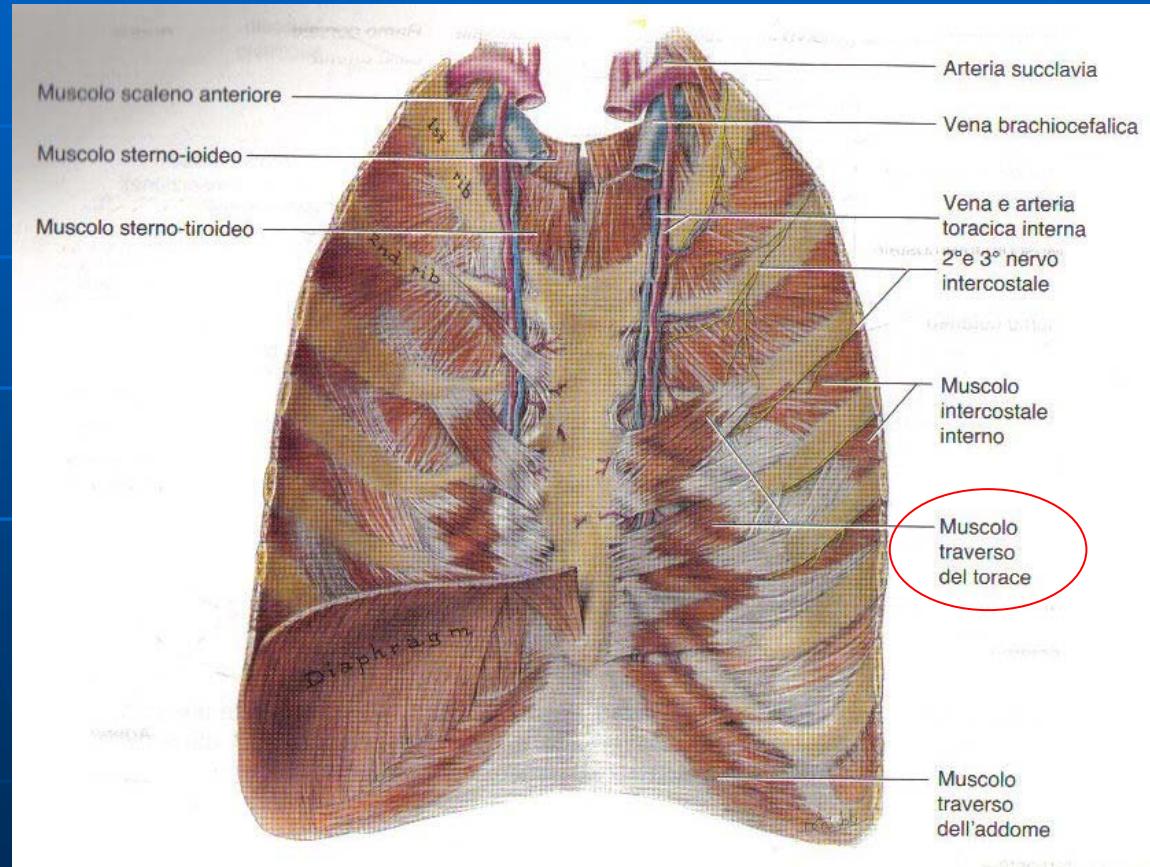

- Elevatori delle coste (12 paia)
- Intercostali (11) est, medi, int

Elevano le coste

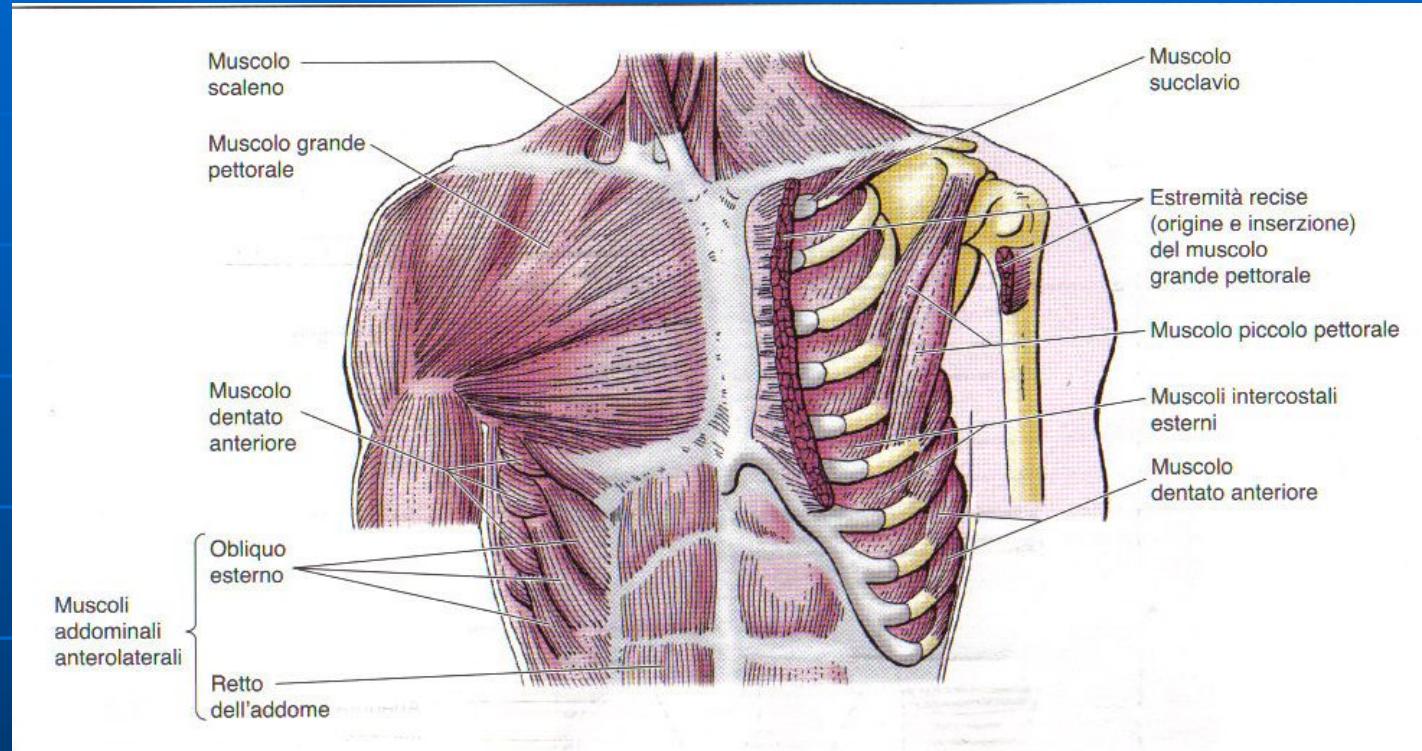

MM intrinseci

Muscolo
trasverso del
torace (2-6[^]
costa)

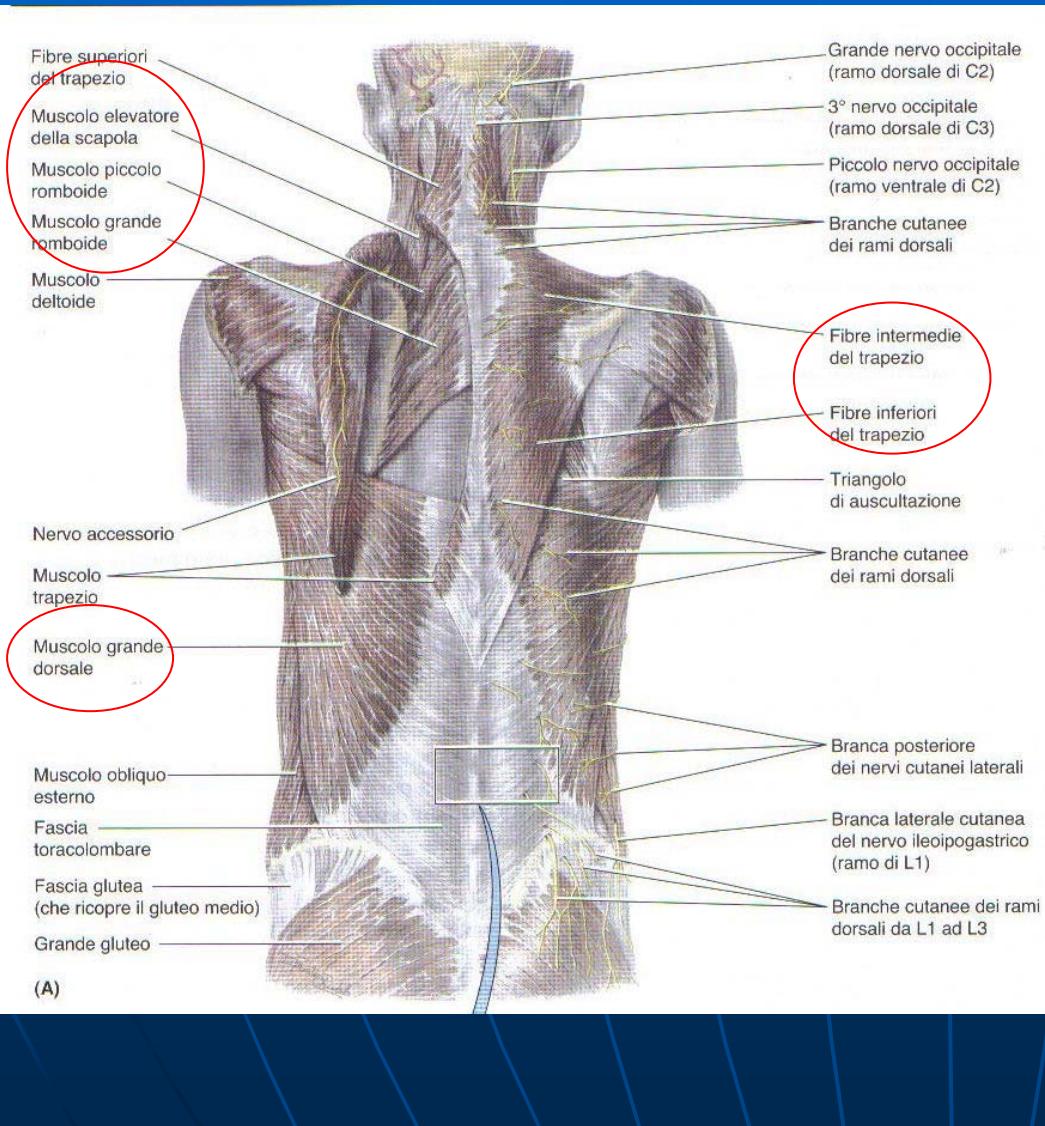

Abbassa le
cartilagini
costali

MM toraco-appendicolari

- Gran pettorale (adduce omero, solleva tronco)
- Piccolo pettorale (\downarrow spalla, \uparrow coste)
- Succclavio (\downarrow clavicola)
- Dentato anteriore (\uparrow coste)

MM spinoappendicolari

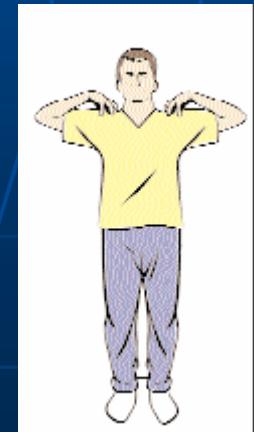

- **Trapezio (\uparrow e adduce spalla)**
- **Gran dorsale (adduce e ruota int omero, m insp)**
- **Romboide (porta med scapola)**
- **Elevatore della scapola**

MM spinocostali

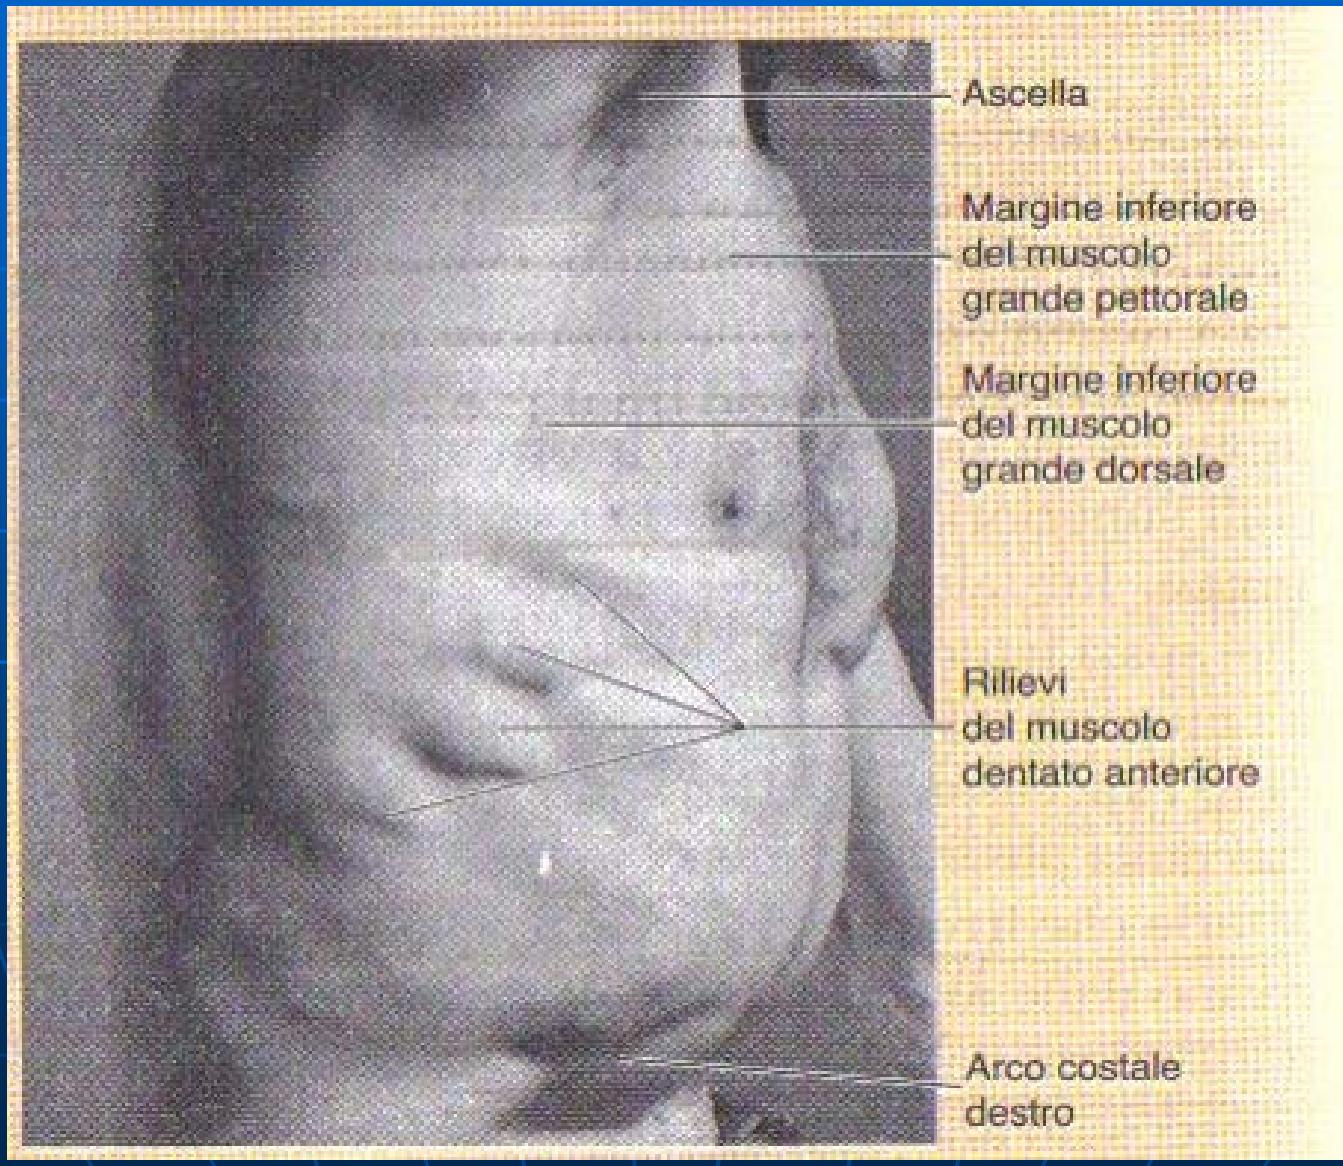

- Dentato posteriore superiore (eleva coste)
- Dentato posteriore inferiore (abassa coste)

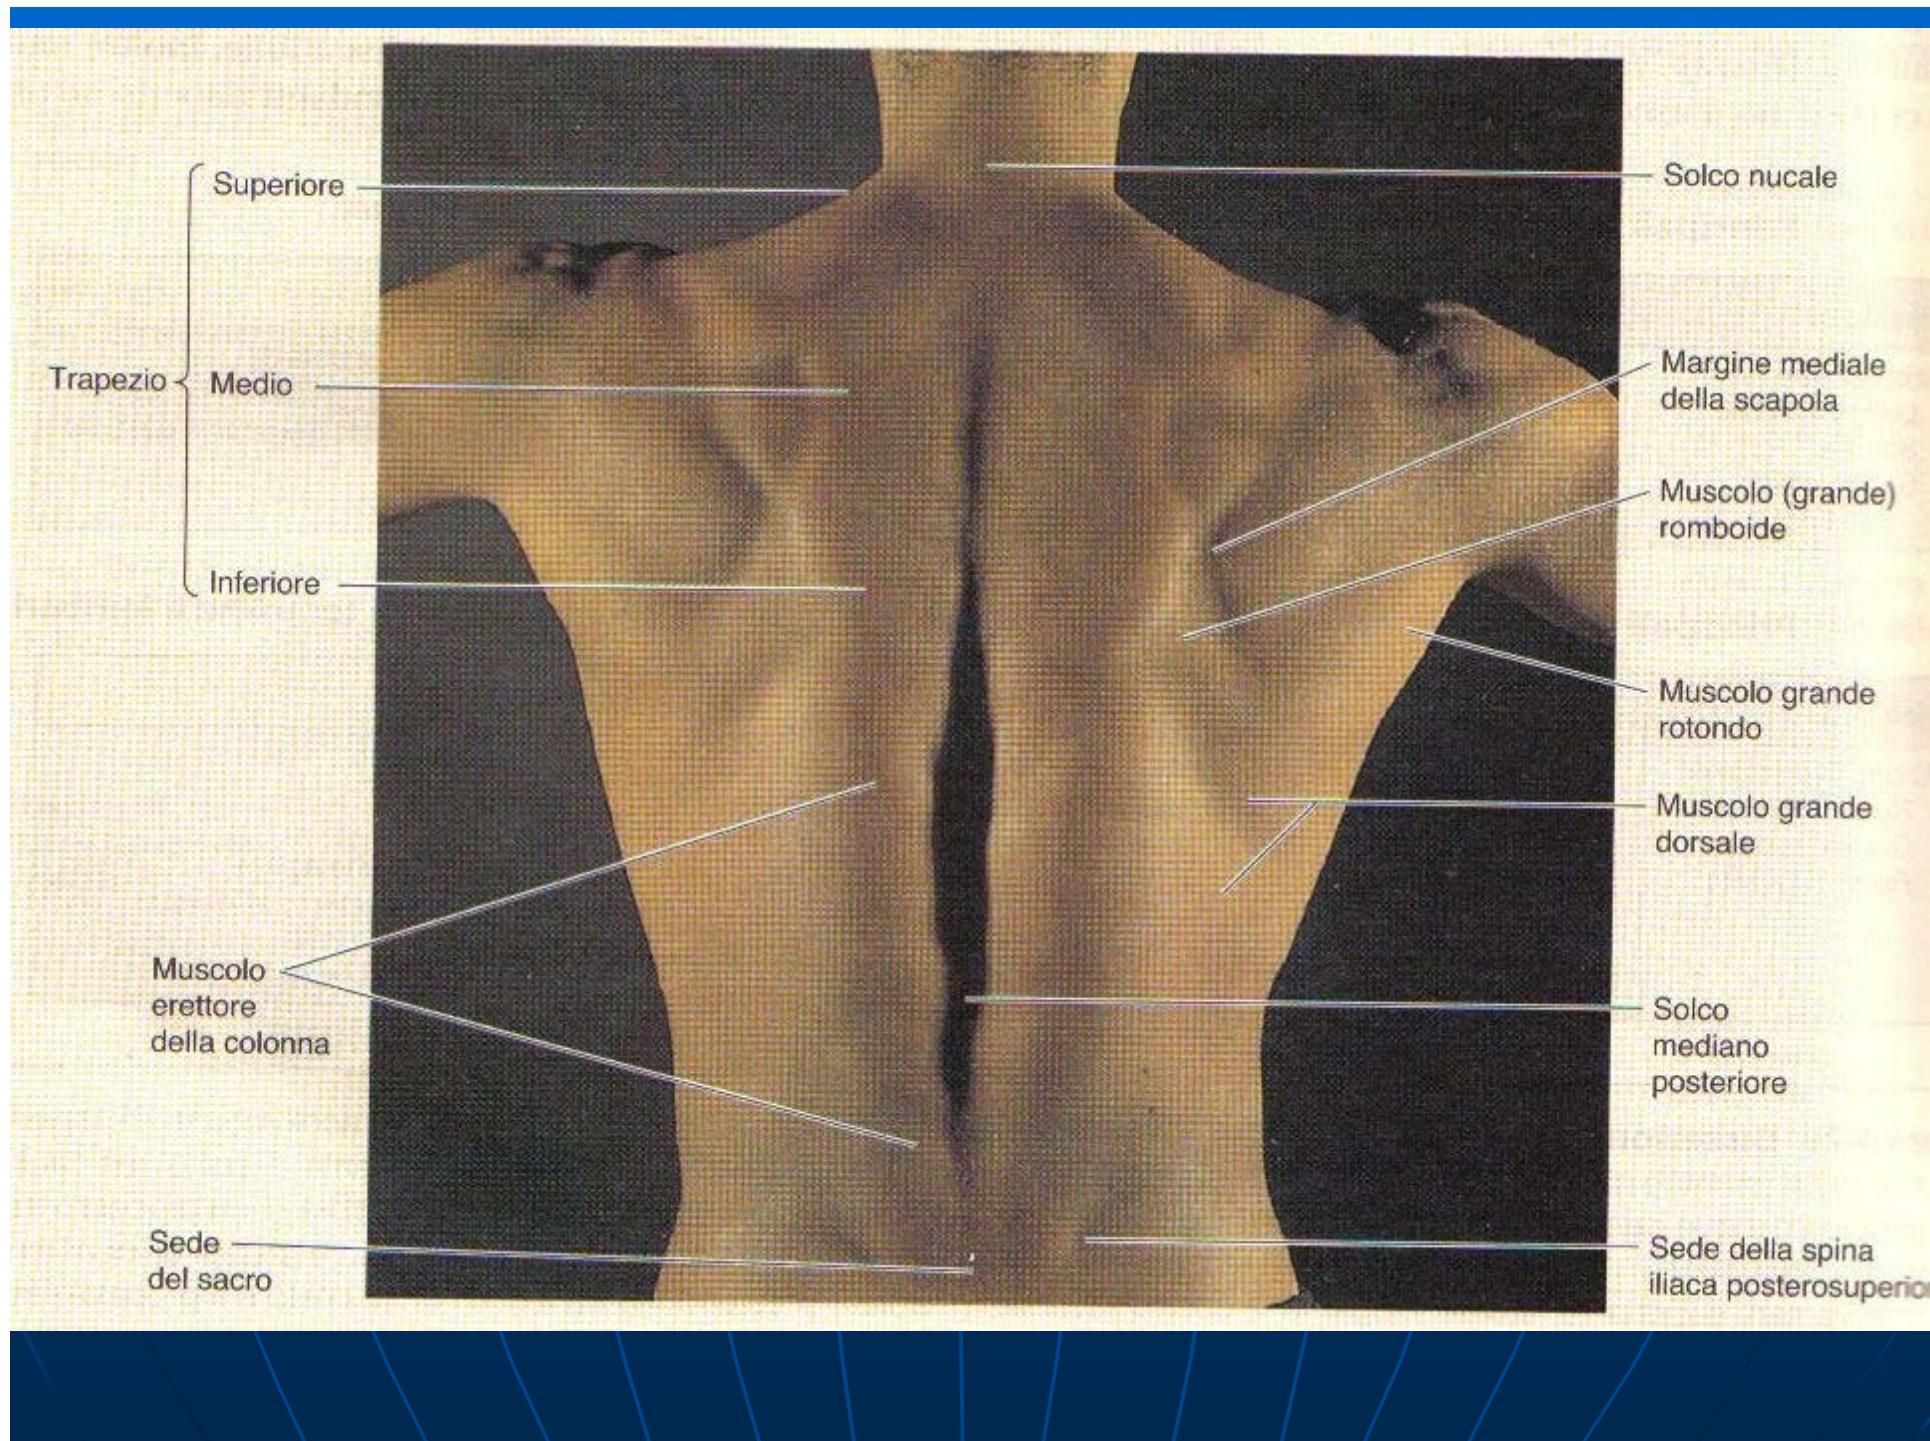

Mm inspiratori

Anatomia superficiale

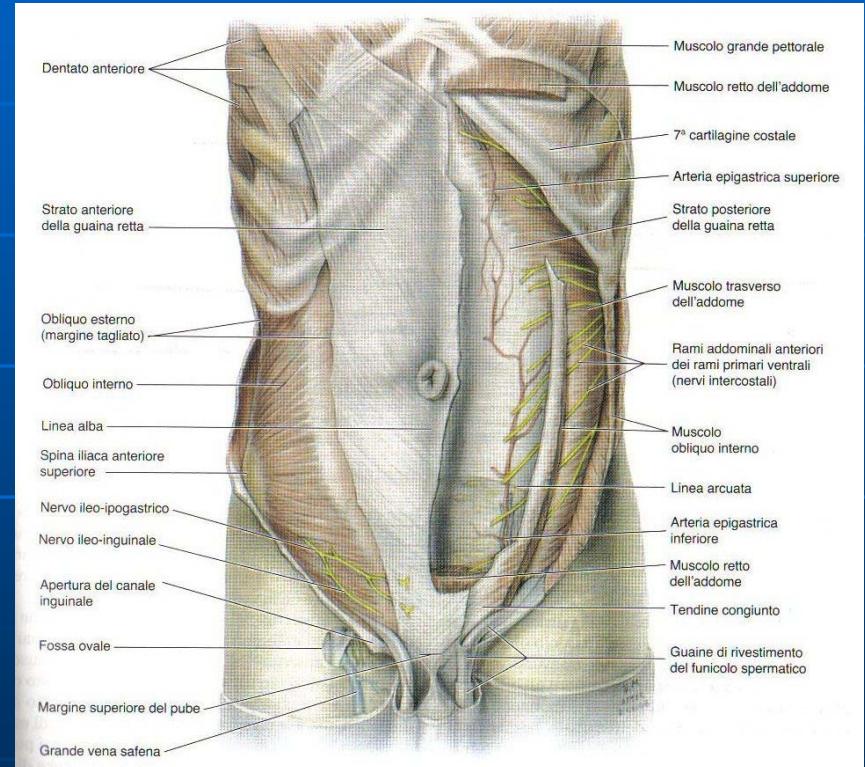

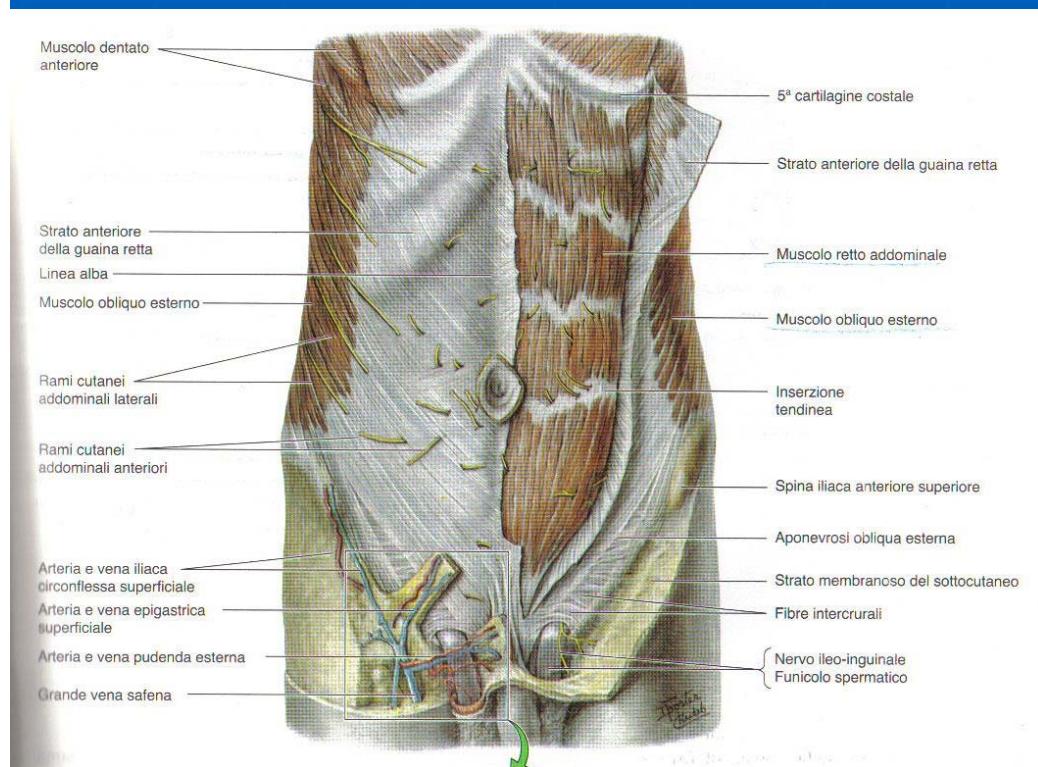

Parete addominale

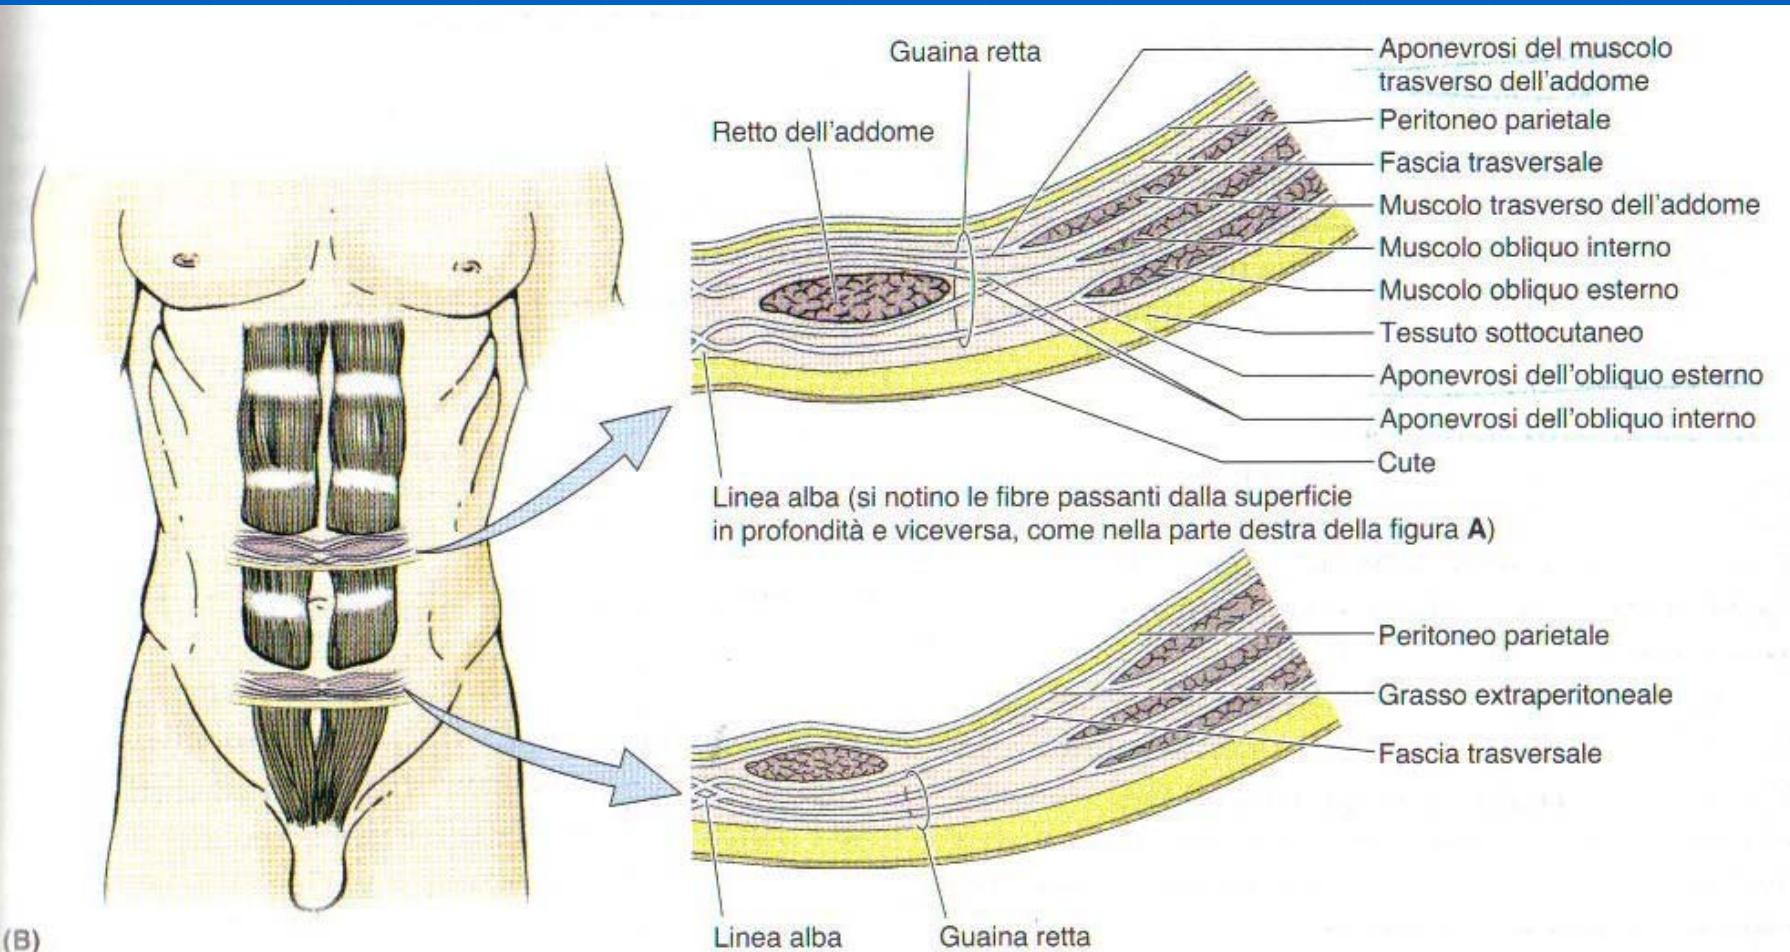

- Retto dell'addome
- Obliquo esterno
- Obliquo interno
- Trasverso
- Quadrato dei lombi nella parte posteriore

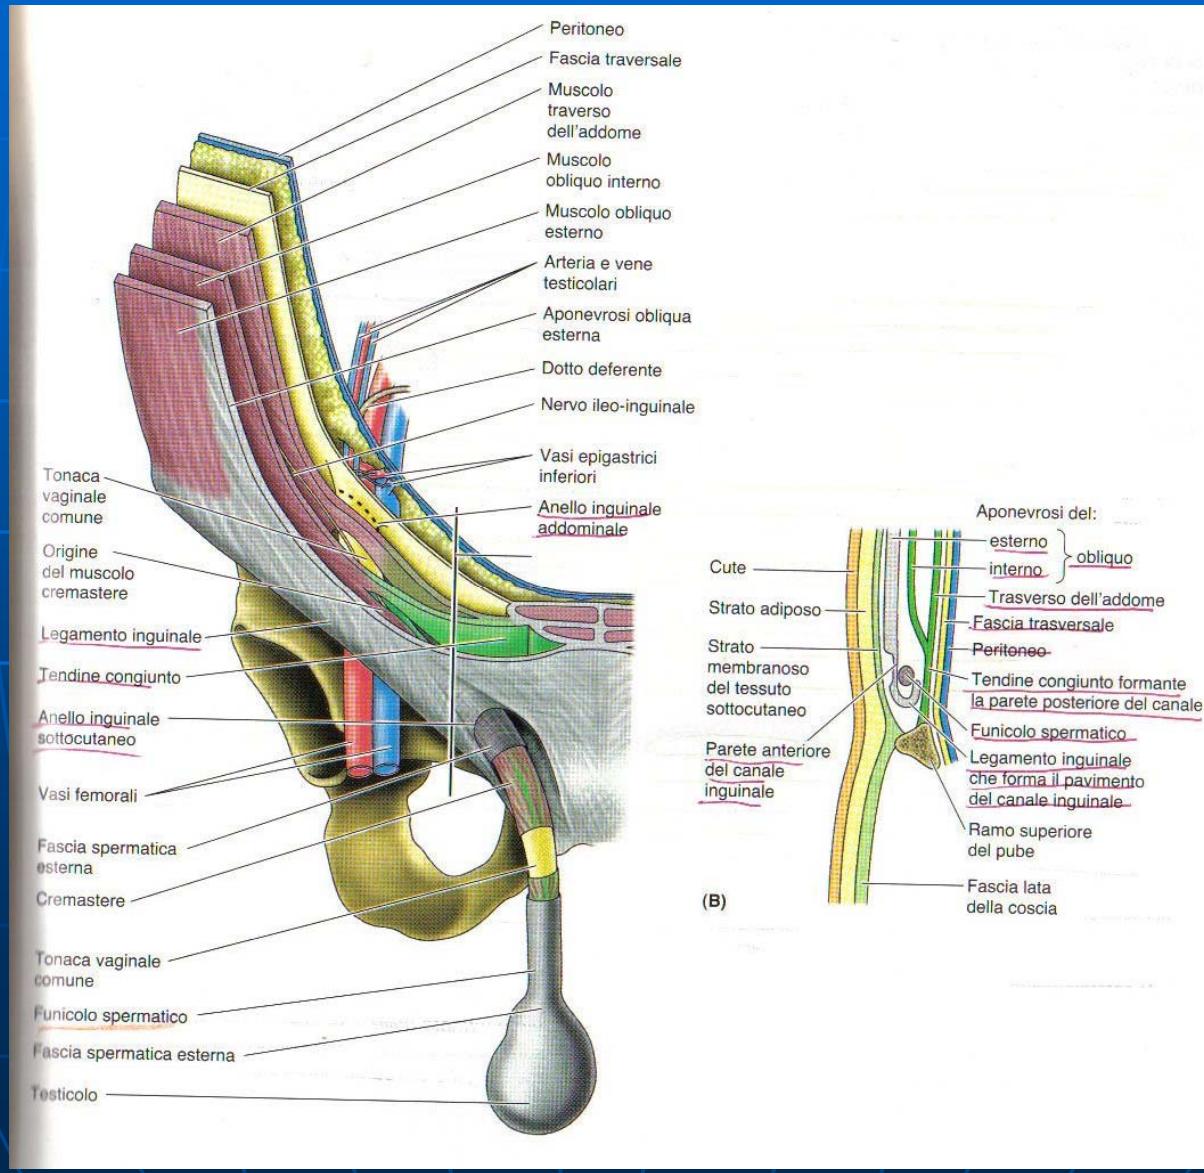

Parete addominale

Sezioni

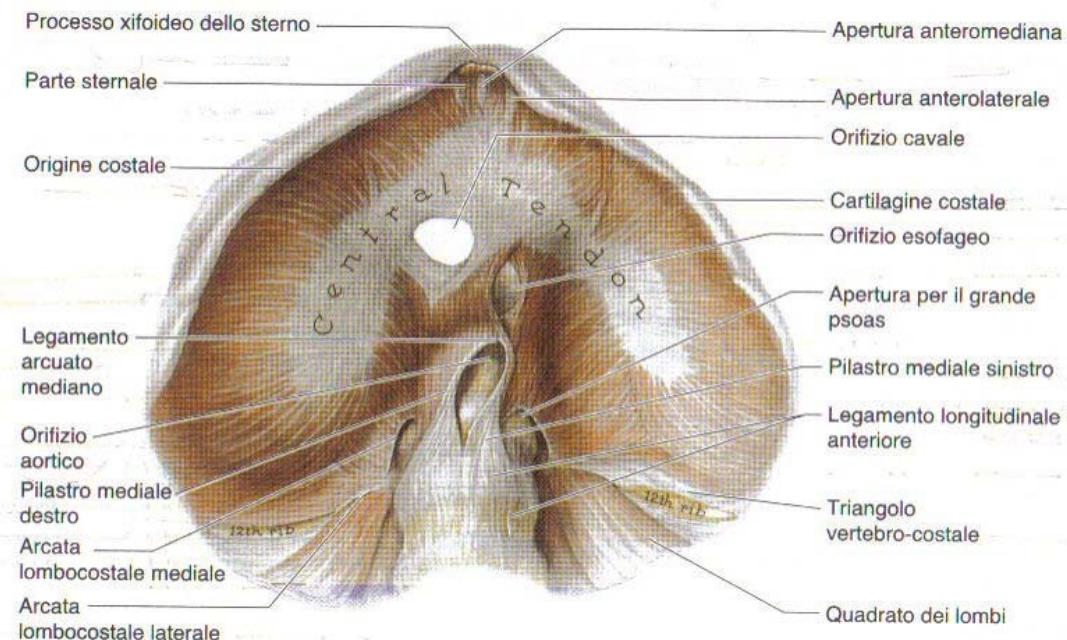

Canale inguinale

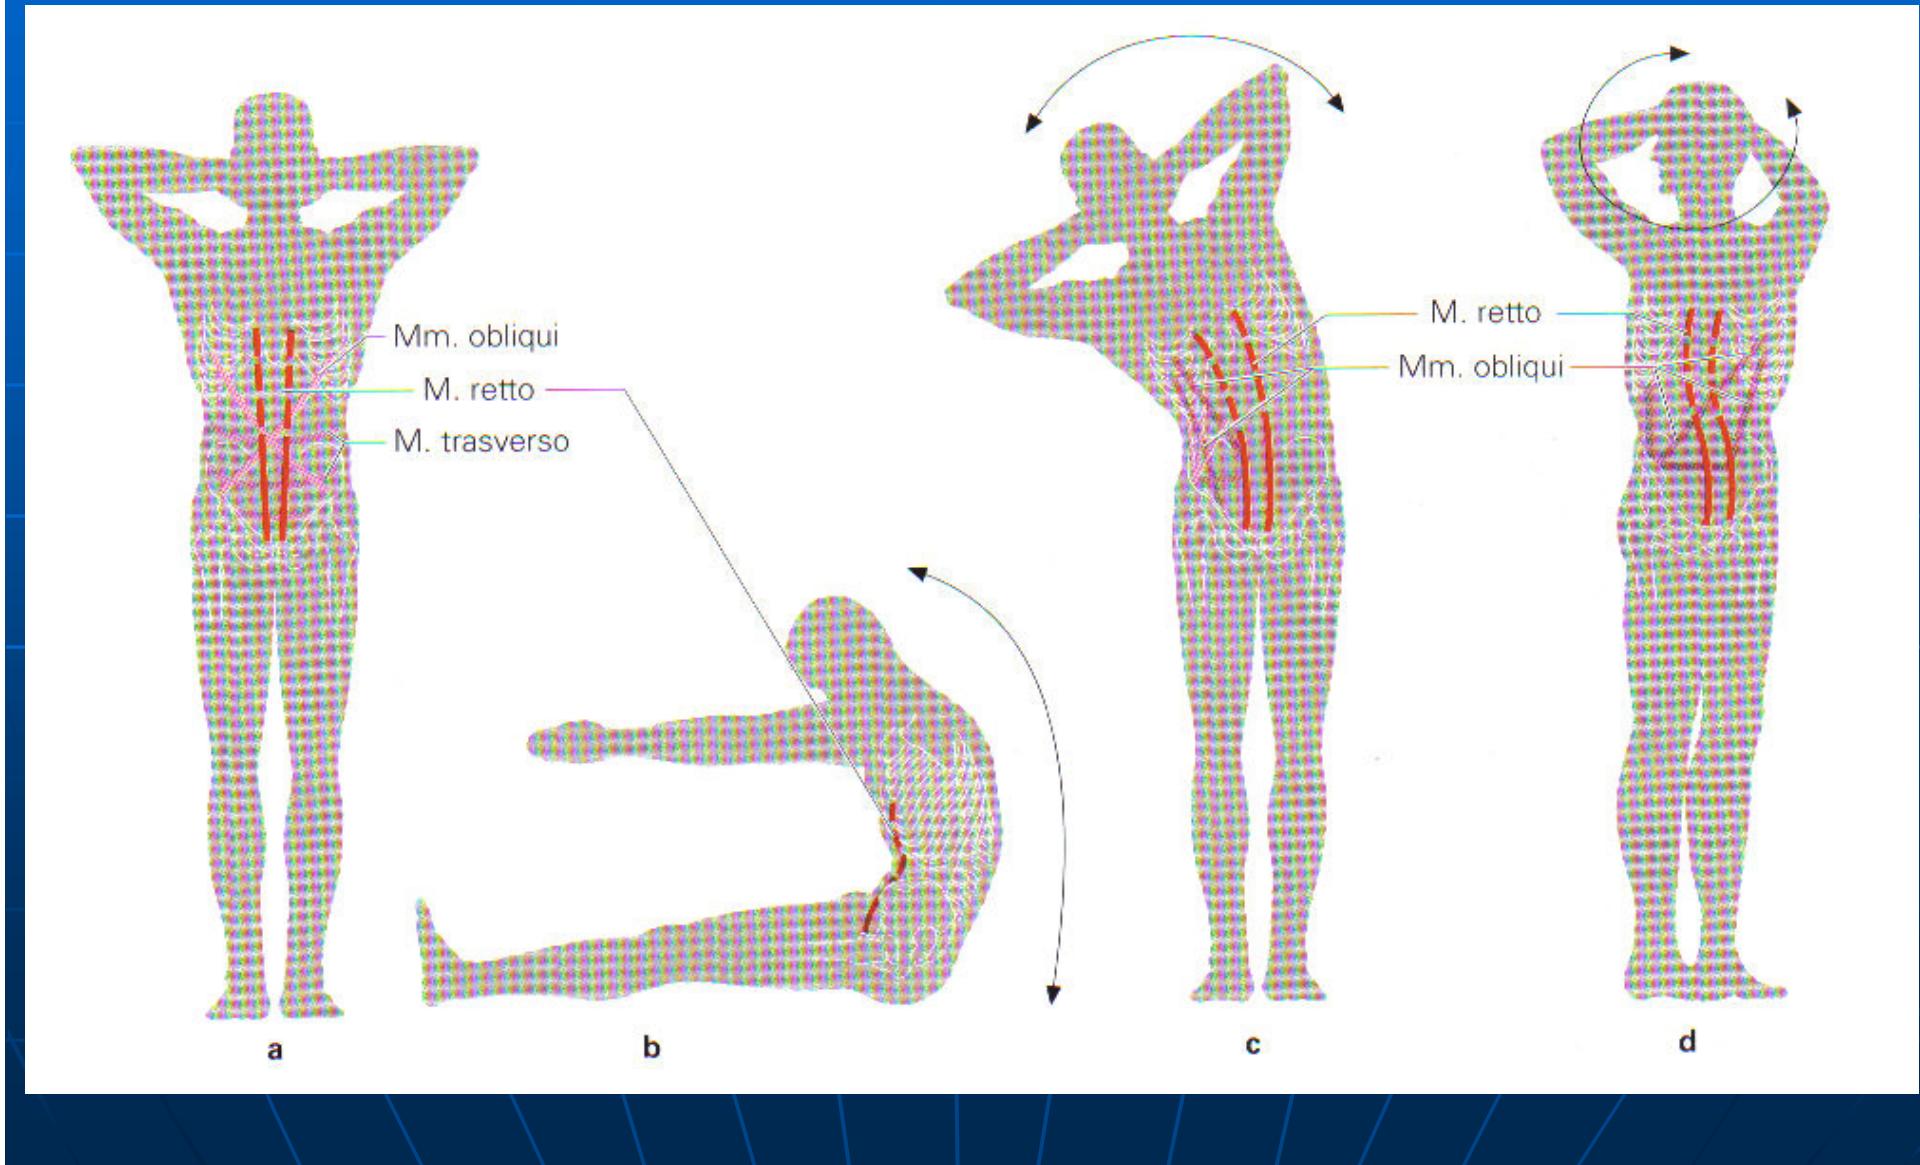

Diaframma

- Centro tendinio
- Pilastri mediari
- Orifici per cava, aorta, esofago

(quadrato dei
lombi)

MM addominali in movimento
